HVAC / PLUMBING

In addition to integrated life safety designs, FTS can design, supply, project manage and commission most HVAC and plumbing systems. We perform life cycle cost analysis and system comparisons to deliver efficient and economical solutions that surpass minimal industry standards.

DESIGN

- Fire Alarm and Emergency Evacuation Systems
- Fire Protection Water Suppression and Special Hazard Systems
- Fire Protection Equipment & Features (Pumps, Tanks, Extinguishers)
- HVAC parts & systems include:
 - Geothermal,
 - 4 Pipe Hydronic,
 - VAV & VRV
- Lighting & Commercial Electrical
- Performance-Based Design Solutions and Alternates
- Design software: Revit, AutoCAD, Microstation, HAP, Trane Trace

PLANNING

- Life Cycle Cost Analysis
- Construction and Program Management Services
- HVAC System Installation Phasing
- Commissioning Planning
- Assessments and Studies

CONSULTING

- Mechanical System Studies including:
 - Existing Building Energy Load Calculations
 - Energy Modeling
- Life Safety Studies, Egress Analysis, Life Safety Code Compliance Third Party Plan Review and Site Inspections including:
 - Firestopping Inspections
 - Fire and Mechanical Systems Testing
 - Commissioning and Acceptance Services.

CODE ANALYSIS

- Complete Building Code
- Mechanical/Plumbing/Fire
- Life Safety
- Passive Fire Protection Systems
